again reforming the CAP ...(…and its Future…)

The European Commission presented its proposal for the common agricultural policy (CAP) reform in 2018, introducing a new way of working to modernise and simplify the EU's policy on agriculture. Following extensive negotiations between the European Parliament, the Council of the EU and the European Commission, agreement was reached and the CAP 2023-27 was formally adopted on 2 December 2021. It entered into force on 1 January 2023.

New CAP 2028 - 2034

The New CAP ...New Vision 2028 – 2034...

CAP is integrated in a larger fund and no longer treated separately.

The budget allocated to agriculture is lowered to 300 bn € from 386 bn

In order to address the complaints from farmers , the bureaucracy is lightened , more autonomy is given to state members and there are less constraints related to environmental obligations
